Proposed Action: I-35E/US 67 Project

Project Limits: I-35E from US 67 to I-30 and US 67 from I-20 to I-35E

City: Dallas County: Dallas State: Texas

TxDOT CSJ(s): 0442-02-088, 0196-03-269, 0261-03-030

In accordance with 23 CFR Section 771.119 and Section 771.121, the Texas Department of Transportation (TxDOT) has determined that the I-35E/US 67 Project will not have a significant impact on the human or natural environment.

This Finding of No Significant Impact (FONSI) for the Preferred Alternative is based on the final Environmental Assessment dated December 2016 and the entire project record. This decision documents the selection of Build Alternative presented in the final EA as the Preferred Alternative, which is described as:

The improvements to I-35E between US 67 and I-30 and to US 67 between I-20 and I-35E. The proposed project would include the following improvements.

- a) I-35E between Colorado Blvd. and Reunion Blvd.: Convert two reversible HOV lanes under construction to two reversible non-tolled express lanes.
- b) I-35E between the US 67 and Colorado Blvd.: Full reconstruction of the freeway and frontage roads and associated ramp modifications and intersection improvements to increase the mainlanes from eight to 10 lanes, include two reversible non-tolled express lanes, and increase the number of frontage road lanes from four to four to six lanes.
- c) US 67 from I-20 to I-35E: Partial reconstruction to widen the mainlanes from four to six lanes and ramp modifications, change the existing two concurrent HOV lanes to one reversible non-tolled express lane within the existing median, and ramp modifications.
- d) Sidewalks and shared use lanes to accommodate vehicles and bicyclists would be implemented along those frontage roads where reconstruction is proposed.
- e) Dedicated bicycle lanes and sidewalks would be implemented at cross-streets proposed for reconstruction.

A Notice of Availability of the draft EA was issued on August 6, 2016.

A public hearing for this project was held on September 6, 2016.

The draft EA was revised to reflect results of the historic resources coordination completed by TxDOT and the THC/SHPO on September 8, 2016.

Public Hearing Documentation has been prepared and is available for review on request.

The final EA and reports contained in the file of record have been independently evaluated by TxDOT and determined to adequately and accurately discuss the need, purpose, alternatives, environmental issues, impacts of the proposed project, and appropriate mitigation measures. These documents provide sufficient evidence and analysis for determining that preparation of an Environmental Impact Statement is not required. These documents are incorporated by reference into this decisional document.

Based upon TxDOT's review and consideration of the analysis and evaluation contained in the EA for this project, and after careful consideration of all social, economic, and environmental factors, including input

#### Finding of No Significant Impact for a FHWA Project

from the public involvement process, TxDOT hereby issues this Finding of No Significant Impact for the I-35E/US 67 Project consisting of improvements to I-35E from US 67 to I-30 and US 67 from I-20 to I-35E.

TxDOT will ensure adherence and completion of all project commitments described in the final EA (December 2016), Section 8.0, TxDOT will ensure that any and all local, state, or federal permit requirements and conditions are met and otherwise complied with.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and the Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

TxDOT Environmental Affairs Division Director
